

**Couva South Government Primary School**  
**Monday 15th October 2018**  
**Ms Suzanne Brice**

I have noticed a drastic change in the behaviour of the students who participated in the A.R.R.O.W. programme, they display eagerness towards their work and they are a lot more settled and focused in class. [There are] two students in particular which must be mentioned.

[Student 1] showed drastic improvement in her overall performance in school. Her reading ability has improved and with that her self-esteem and self-confidence. She is now accepting help and pushing herself to do more.

[Student 2] showed an overall improvement in reading and spelling. His handwriting and his self-confidence have also improved drastically.

I have noticed remarkable improvement also with the standard five (5) students who participated on the A.R.R.O.W. programme and I have come to the conclusion that the A.R.R.O.W. programme is remarkable and provides the students with a balanced forum to improve on themselves holistically. A.R.R.O.W. helps the students with their reading, writing, spelling concentration self-esteem confidence and much more. This programme is one I would recommend to anyone and would love to see the programme continue in the school so that the teachers can be trained for Phase II to continue to process and student progression.
